

Chattanooga-Hamilton County/North Georgia TPO

2050 Travel Demand Model Update

2045 TDM (RSG) - 2014 base year

2050 TDM Update (WSP) - 2019 base year

TASK 1: NETWORK VALIDATION AND UPDATES

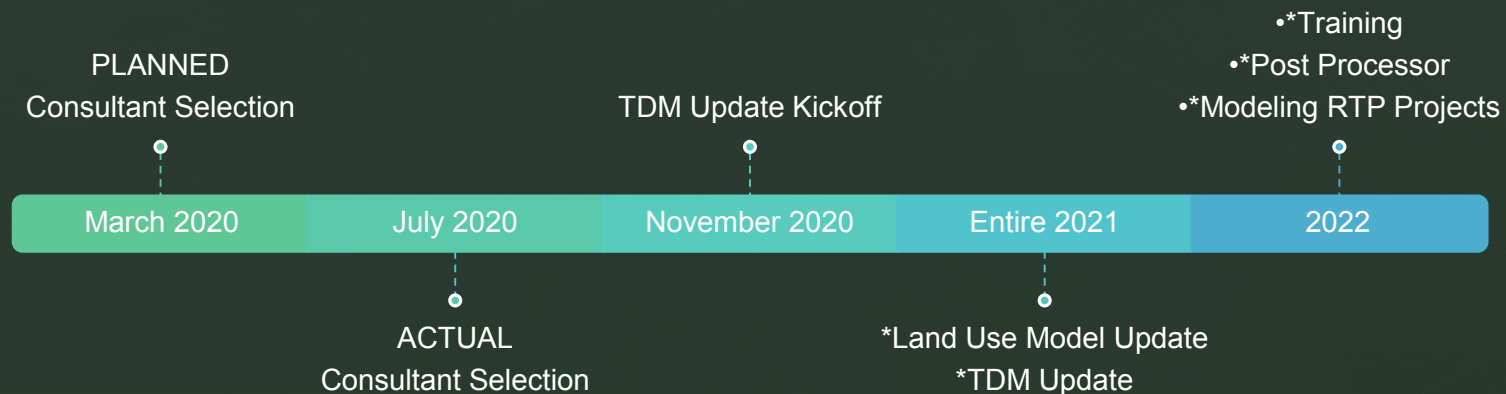

TASK 2: SOCIOECONOMIC DATA UPDATE AND REVIEW

TASK 3: MODEL VALIDATION

TASK 4: MODEL CALIBRATION

TASK 5: MODEL IMPROVEMENT PROGRAM

TASK 6: USERS' GUIDE AND TRAINING

Change in Number of Lanes

CHECK/ FIX

Check of segments where Change in 'Number of Lanes' is 3 or greater, and change in heading is slight (indicates low probability of Turn).

Change in Number of Lanes and minor change in Heading

Node Link-IN Link-OUT validation: NUMBER OF LANES and HEADING

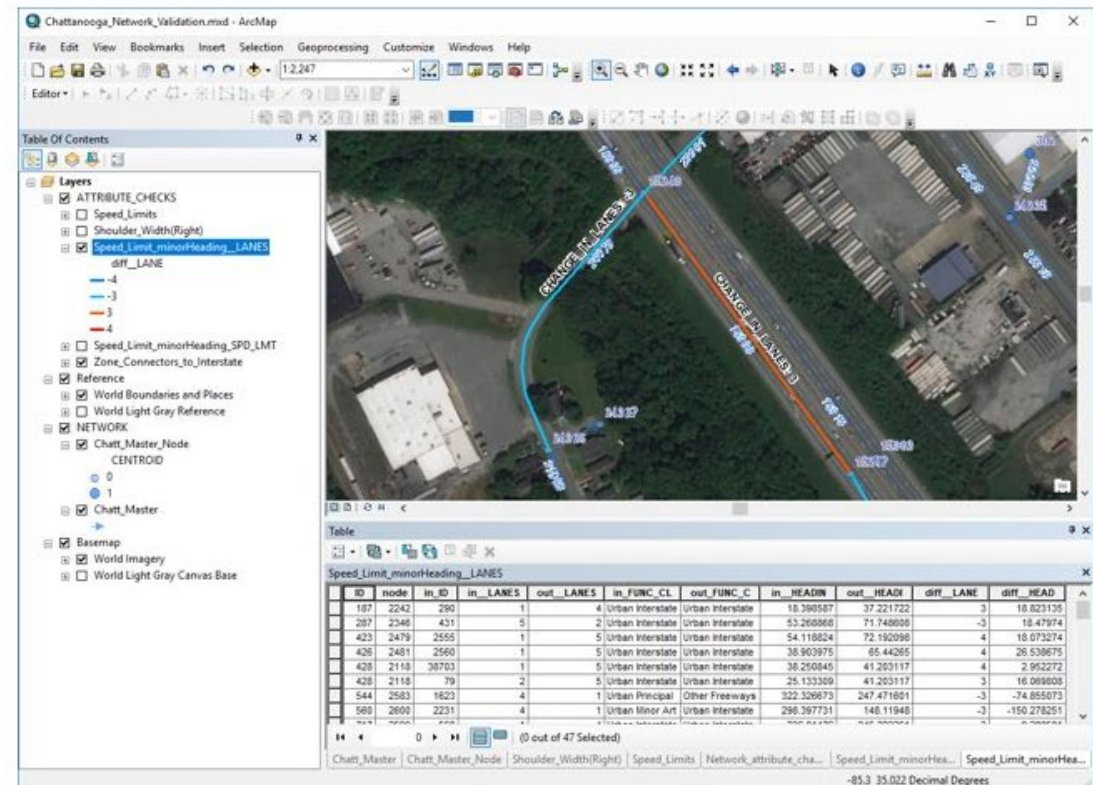

```
### SPECIFY PARAMETERS
# Attribute to validate:
attribute_names = ['LANES', 'HEADING', 'FUNC_CLASS']
# Filter by CHANGE in attribute value (Equal to or Greater than) and Export long table:
attribute_filters = {
    'LANES': 3,
    'HEADING': 30
}
# Summarize by Node Maximum value and Export Geo:
export_geometry = True
# Export name:
export_name = 'NumberLanes_minorHeading'

### RUN FUNCTIONS
network = compare_attributes(attribute_names, attribute_filters, export_geometry, export_name)

### ADDITIONAL FILTERING
network[network['diff_HEADING'] <= 30].drop(columns=['geometry'])

Total network links with change in LANES, HEADING, FUNC_CLASS: 47
Table exported to ..data\NumberLanes_minorHeading_LANES_HEADING_FUNC_CLASS.csv
Shapefile exported to ..data\NumberLanes_minorHeading_LANES.shp
```

Change in Speed

CHECK/ FIX

Check of segments where Change in 'Speed Limit' is 25 MPH or greater, and change in heading is slight (indicates low probability of Turn).

Change in Speed and minor change in Heading

Node Link-IN Link-OUT validation: SPEED LIMIT and HEADING

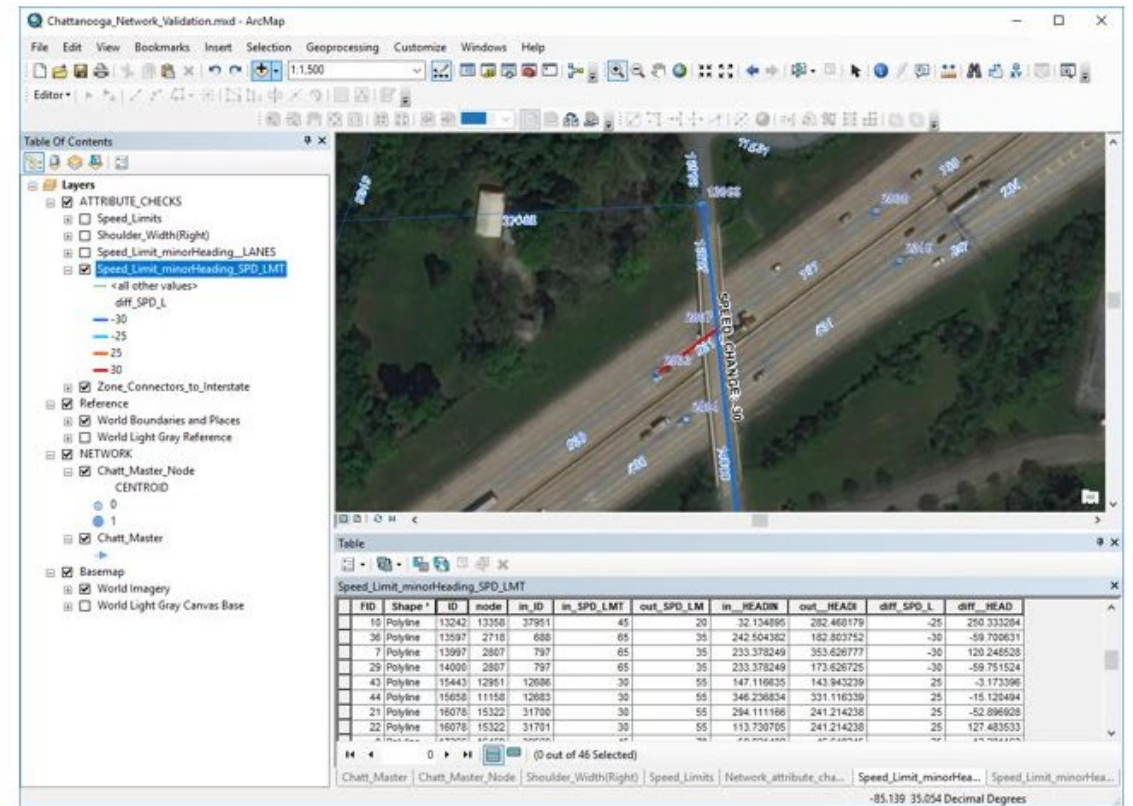

```
## SPECIFY PARAMETERS
# Attribute to validate:
attribute_names = ['SPD_LMT', '_HEADING']
# Filter by CHANGE in attribute value (Equal to or Greater than) and Export long table:
attribute_filters = {
    'SPD_LMT': 25,
    '_HEADING': 30
}
# Summarize by Node Maximum value and Export Geo:
export_geometry = True
# Export name:
export_name = 'Speed_Limit_minorHeading'

## RUN FUNCTIONS
network = compare_attributes(attribute_names, attribute_filters, export_geometry, export_name)

## ADDITIONAL FILTERING
network[network['_dH_SPD_LMT'] <= 30].drop(columns=['geometry'])

Total network links with change in SPD_LMT, _HEADING: 46
Table exported to ..\data\Speed_Limit_minorHeading_SPD_LMT_HEADING.csv
Shapefile exported to ..\data\Speed_Limit_minorHeading_SPD_LMT.shp

MODEL VALIDATION \ CALIBRATION

- Static Model Validation
 - Ran DaySim with updated networks and socioeconomic data.
 - Calibrated work location, school location, daily activity pattern, tour mode, tour schedule, trip mode and trip schedule to the 2010 Household Survey
- ❖ Third Party Data Purchase Recommendation
 - INRX
- Dynamic Model Validation

MODEL VALIDATION

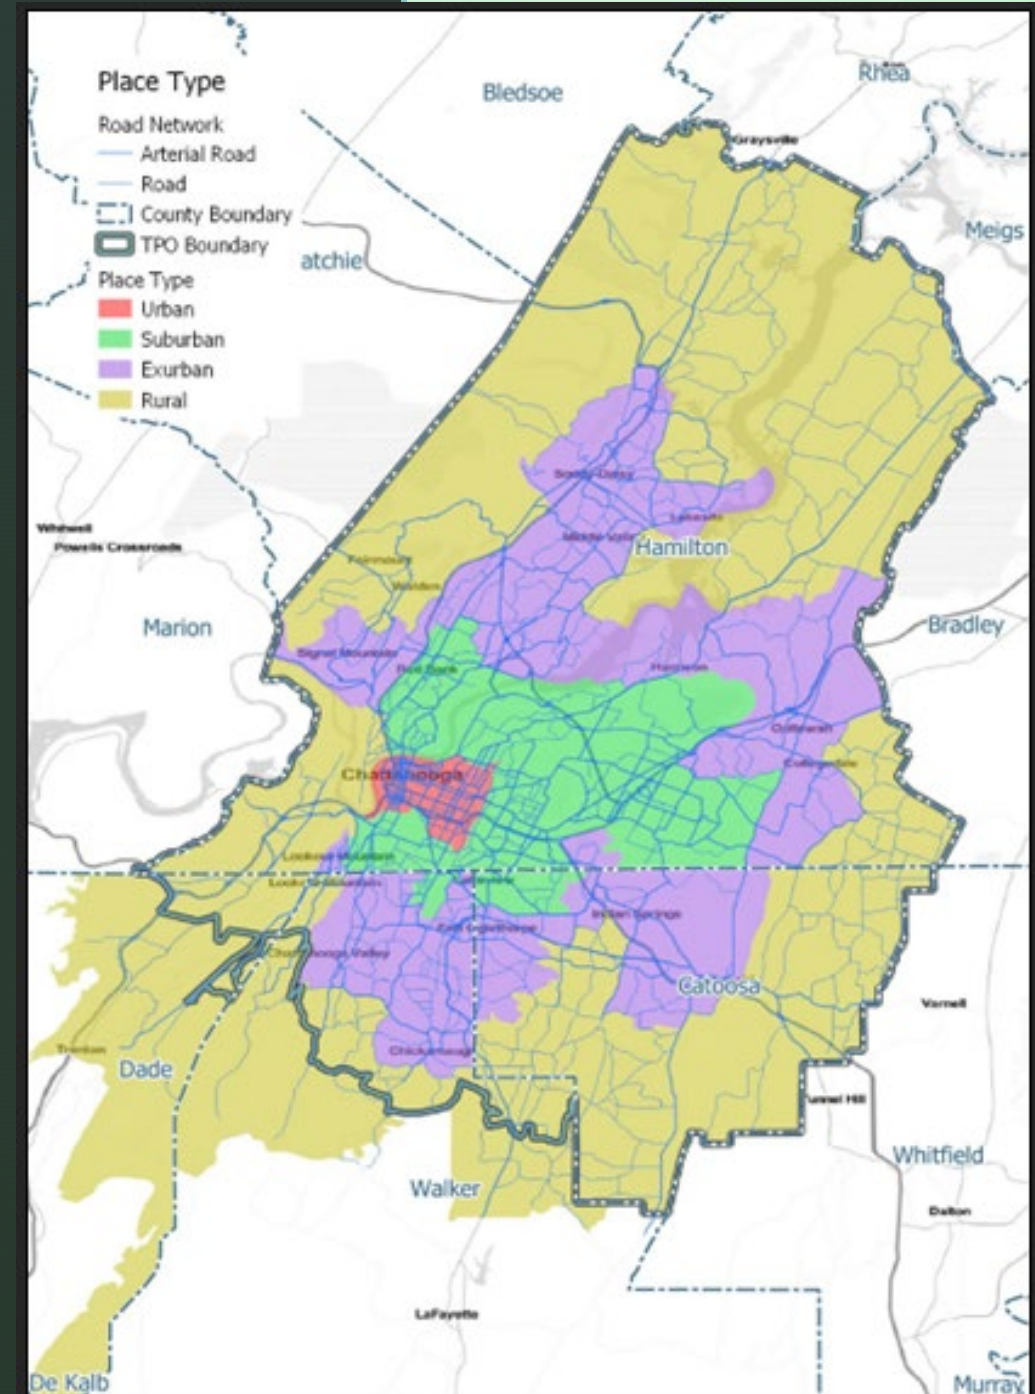

- Dynamic Model Validation
- Land Use Sensitivity
- Roadway Capacity Change

Table 57: Assigned Volumes and Speeds, Model Area

	Reduced Urban Density	Baseline	Increased Urban Density
VMT	12,508,823	12,505,591	12,518,040
VHT	355,164	357,188	360,614
Speed	35.75	35.74	35.70
VMT In Congested Conditions ¹⁰	45,554	49,237	53,288

Table 58: Assigned Volumes and Speeds, Urban Area

	Reduced Urban Density	Baseline	Increased Urban Density
VMT	1,098,582	1,164,107	1,230,469
VHT	38,600	42,121	45,856
Speed	31.11	30.78	30.37
VMT In Congested Conditions	17,123	18,973	19,717

MODEL VALIDATION

- Dynamic Model Validation
 - Land Use Sensitivity
 - Roadway Capacity Change (bridges)

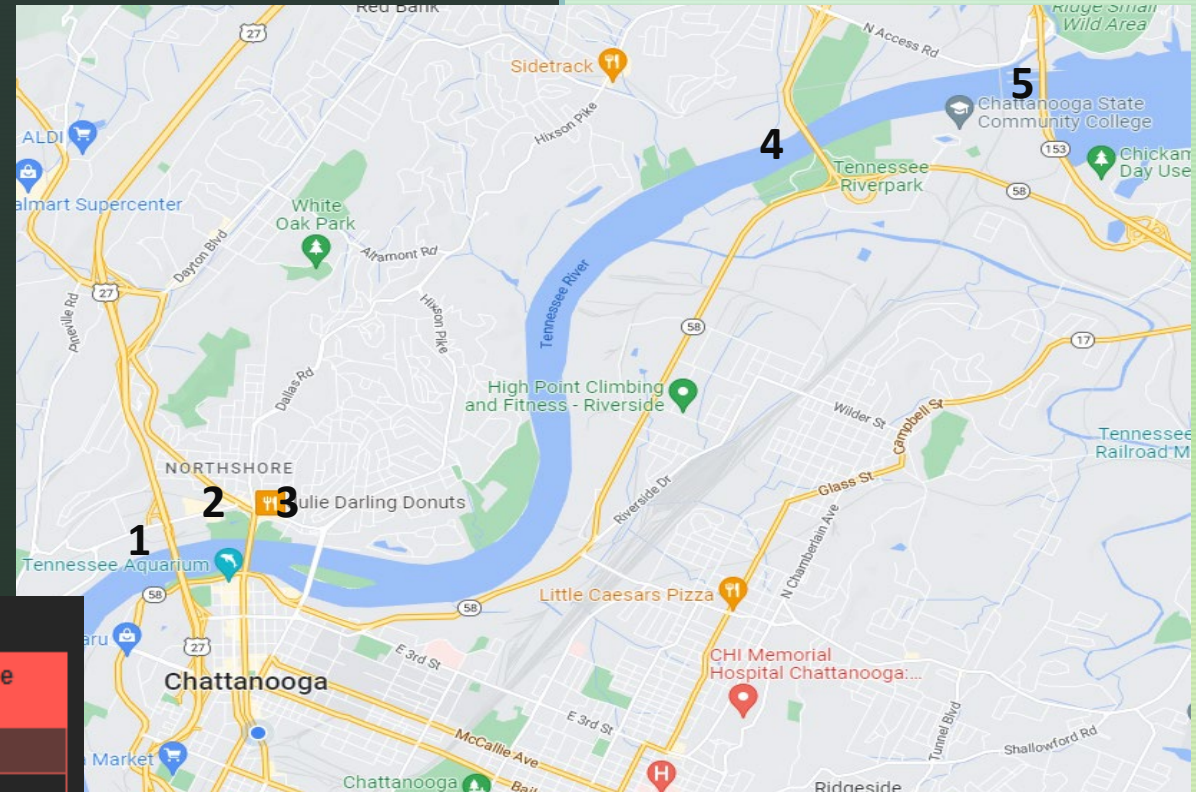

Table 60: Assigned Volumes and Speeds, Model Area

	Reduced Bridge Capacity	Baseline	Increased Bridge Capacity
VMT	12,506,370	12,505,591	12,514,050
VHT	357,864	357,188	356,696
Speed	35.73	35.74	35.73
VMT In Congested Conditions ¹¹	53,999	49,237	47,017

Table 61: Assigned Volumes and Speeds, 2-mile Buffer Area of the Bridges

	Reduced Bridge Capacity	Baseline	Increased Bridge Capacity
VMT	744,993	750,220	755,033
VHT	28,560	28,297	28,091
Speed	30.76	30.81	30.76
VMT In Congested Conditions ¹²	15,027	11,814	11,472

Coordination Agreement Deliverable: Existing Conditions & Trends: *2019 Model Output*

2.	<p>Existing Conditions & Trends: <i>2019 Model Outputs</i></p> <p><i>Definition of 2019 Model: 2015 model network updated to 2019 with 2019 socioeconomic data (land use and demographic data in activity-based model) and calibrated and validated. RTP team will proceed with data while TDOT is reviewing for concurrence but R&A team will need to resubmit files if major comments provided by TDOT during review)</i></p>	<p>10. 2019 loaded network exported from TransCAD to GIS layer (see definition of 2019 model)</p> <p>11. 2019 model trip table exported from TransCAD (aggregated to district</p> <p>Maps (including GIS layer and .mxd files and .png image files) using GIS template provided by RTP team, as follows for 2019 validated model:</p> <p>12. Map: AM Peak LOS (based on volume/capacity ratio)</p> <p>13. Map: PM Peak LOS (based on volume/capacity ratio)</p> <p>14. Map: VMT (graduated color and bandwidth)</p> <p>15. Map: Vehicle Hours of Delay (graduated color and bandwidth)</p> <p>16. Map: Congested Speeds (graduated color and bandwidth)</p> <p>17. Map: Transit Route Ridership (graduated color and bandwidth)</p> <p>18. Map: Origin of Passenger Vehicle Trips by TAZ (graduated color)</p> <p>19. Map: Origin of Transit Trips by TAZ (graduated color)</p> <p>20. Map: Origin of Truck Trips by TAZ (graduated color)</p> <p>21. Map: Destination of Passenger Vehicle Trips by TAZ (graduated color)</p> <p>22. Map: Destination of Transit Trips by TAZ (graduated color)</p> <p>23. Map: Destination of Truck Trips by TAZ (graduated color)</p> <p>Summary tables in Excel format, as follows:</p> <p>24. Table: VMT by HPMS Functional Class and County</p> <p>25. Table: Vehicle Hours of Delay by HPMS Functional Class and County</p> <p>26. Table: Congested Speeds by HPMS Functional Class and County</p> <p><i>(Note: RTP group will still need the model data, regardless of if we have a contingency plan to deploy if the model is not done in time for RTP.)</i></p>	<p>3/1/21 (R&A to discuss model certification process with TDOT)</p> <p>9/30/21 (submitted to TDOT for concurrence/ approval and to SRP team simultaneously)</p>	R&A	Yes
----	--	--	--	-----	-----

Working Schema

- A **QGIS Project**, which collects the data and their symbology as Layers. This is an intermediate file.
- The **Python Scripts** which includes the Template information and generate the Maps, populate them into the QGIS Map document and export them as Map deliverables.
- A **Data** directory is a repository for all data used, in Shapefile format.
- A **Map Definitions** directory with YAML file that contains parameters and specifications for each Map to be produced.
- A **Map Deliverables** directory, that serves as repository for finalized Maps in Image format.

DATA SOURCES

2010 Household Travel Survey

2015 CARTA On-Board Survey

2015-2019 5-year US Census Bureau American Community Survey Data

2014-2019 County Building Permits

RPA 2050 Land Use Model future growth and employment

Employment :

- Infogroup Business Data,
- Quarterly Census of Employment and Wages (QCEW) from TN Dept of Labor and Workforce Development
- Chamber of Commerce's major employers
- US Census Longitudinal Employment-Household Dynamics (LEHD)

Network:

- 2014 highway network updated to 2019 based on observed conditions and Google imagery
- TN DOT Annual Average Daily Traffic Maps
- GA DOT Traffic Analysis & Data Application
- FHWA 2018 HPMS Data Release
- 2019 INRX Vehicle Flow Data

MODEL IMPROVEMENT PROGRAM

- Update TAZ / MicroZones
- Model Software
 - Update TransCAD from v7 to v10
 - Add to GISDK ability to start from intermediate locations of the model?
 - ABM Software:
 - Stay in DaySim (check for newer version?)
 - ActivitySim
 - CT-RAMP2
 - TransCAD ABM if want to maintain all in one package
- Work From Home
 - How can it be incorporated?
 - New model component?
 - Off-model process?
- Mode Choice - Add Passenger Rail component

USER GUIDE AND TRAINING

Sessions:

- 7 initial sessions and 1 follow up session

Duration: 2:00 hour sessions

Dates: March 21, 2022, through April 26, 2022

Location: Zoom Based

Session – General Questions	
Date 4/26	
Duration 2:00	
<ul style="list-style-type: none"> • General questions <ul style="list-style-type: none"> ◦ Attributes and Formulas ◦ Facility Class, Ramps and Roundabouts ◦ Weekday vs Weekend Modeling ◦ Gas prices ◦ Network Creation ◦ Employment Crosswalk table ◦ Additional Questions <ul style="list-style-type: none"> ▪ Work from Home proposal ▪ Post-process tool ▪ JAR files in Server ▪ Documentation 	<ul style="list-style-type: none"> • The role of various data fields (variables) such as employment sectors, parking, school enrollment, group quarter population, age groups and income in the mathematical formula of the model. • The current model is for workdays only, will is involved to expand the model to 7 days? • How do you modify Gas prices? What model components does it change? What are the final impacts? • How are Highway Network, Transit Network and Walk Network created?

Topics	General questions
Session# 1 General setup and structure of the TDM Date 3/21 Duration 1:30	
<ul style="list-style-type: none"> • Introduction 	
Session #2 Validation & Calibration Date 3/23 Duration 2:00	
<ul style="list-style-type: none"> • Model Use Case Studies 	<ul style="list-style-type: none"> • Project the external station counts. How did the model estimate
Session #3 Model Code and Sub-Model Components Date 4/1 Duration 2:00	
<ul style="list-style-type: none"> • TDM Validation & Calibration (Continued) <ul style="list-style-type: none"> ◦ Assignment and Skimming 	<ul style="list-style-type: none"> • How to compare the AADT and the model run results since not every
Session #4 DaySim & PopSyn Date 4/12 Duration 2:00	
<ul style="list-style-type: none"> • Sub-Model components: (Continued) <ul style="list-style-type: none"> ◦ External Travel Model 	<ul style="list-style-type: none"> • How to generate the buffer file, set up and what is its function?
Session #5 Model Debugging Date 4/13 Duration 1:30	
<ul style="list-style-type: none"> • Performance Metric Reporting 	<ul style="list-style-type: none"> • Common Errors
Session #6 Model Improvements & Enhancements Date 4/25 Duration 2:00	
<ul style="list-style-type: none"> • Interactive setup of Select Link Analysis 	<ul style="list-style-type: none"> • The current model is for workdays only, will is involved to expand the
Session #7 Model Improvements & Enhancements, Date 4/26 Duration 2:00	
<ul style="list-style-type: none"> • Mapping of Select Link Analysis from Session #6 • Model and Data Management <ul style="list-style-type: none"> ◦ Data Management 	<ul style="list-style-type: none"> • How to use TDM to evaluate project proposal and policies, like change of transit fare and work from home, etc.

(423) 643-5900 main

What's up in Chattanooga:

- RITSA – Approved August 24
(Regional Intelligent Transportation System Architecture and Deployment Plan)
- 2023-26 TIP – anticipated Board approval Nov 9
- CMP - anticipated Board approval Nov 9
- TDM Update – complete
- LRTP – project evaluation, final model runs in Dec
- Safe Streets for All (SS4A) – Applied for in September
 - Comprehensive Safety Action Plan
- StoryMaps and Dashboards
 - LUM
 - TDM
 - CMP
